

Enterprise Productivity in the Cloud; work anytime, anywhere

Your people need to be connected and collaborative when in and out of the office. Microsoft Office 365 can help you achieve these results and help meet your needs for robust security, continual reliability, and user productivity. Office 365 brings together online versions of trusted communication and collaboration solutions, including Exchange Online, SharePoint Online, and Lync Online as well as Microsoft Office Professional Plus and Microsoft Office Web Apps. With these solutions, your business moves forward, from virtually anywhere and virtually any device.

How can Office 365 Help You?

Office 365 lets you quickly enhance and expand your collaboration and communication services with enterprise-class security and reliability. You don't have to worry about costly server deployment or time-consuming server maintenance tasks. Because it's designed to work with the Office applications your people already know, you can offer them best productivity experience across the PC, phone, and browser— without heavily investing in retraining.

"By going with Microsoft Online Services, we made a strategic decision to work with Microsoft in building long-term business value, and we avoided \$500,000 annually on the cost of an on-premises environment."

– Mark Hale, Executive Vice President, Operations and Chief Technology Officer, Scripps Networks Interactive (Food Network, Garden TV and magazines)

Enterprise-Class Security and Reliability

You depend on collaboration and communication to make your business successful. You need your services to be available at any time. Office 365 runs on a global network of data centers geographically dispersed and fully redundant, designed with enterprise-grade reliability and disaster recover capabilities. The data centers employ operational best practices so that your content and services are always available. As a result, when the services are released for general availability, they will be backed with a financially backed Service Level Agreement (SLA) for a guaranteed 99.9-percent scheduled uptime.

IT Control and Efficiency

Office 365 reduces the burden of performing routine IT management tasks such as retaining current security updates and upgrading back-end systems. Your IT staff retains control over user management and service

configuration, so they can adjust the services to meet how your company does business. Office 365 includes around-the-clock IT-level support, so your IT staff can always find help if they need it.

User Familiarity and Productivity

Office 365 gives your business the powerful productivity capabilities of SharePoint Online, Exchange Online, and Lync Online, as well as Office Professional Plus and Office Web Apps—offering flexible, and familiar ways for your people to deliver their best work and stay productive—regardless of where they are or the devices they use.

Office 365: The next Generation of Computing

With Office 365, you can take advantage of sophisticated collaboration and messaging capabilities without the operational burden of on-premises server software. Office 365 keeps you in control and provides business-class reliability, high availability, comprehensive security, simplified managements, and familiar user interface so that you confidently choose it as your collaboration and communication solution.
